If you have any questions, feel free to contact us directly via support@pleiades-software.com. If you are curious about the features of PixInsight, check out the overview. Features Overview ===== ****FAST BURN**** You can add a burn using the FAST BURN tool to create an image with a longer exposure time. ****MAGNETIC TURNING**** The magnetic turning tool can be used to expose longer exposure time images. The magnet is fitted on the side of the telescope so that the image is aligned with the direction of the magnet. ****MIRROR CORRECTION**** It is possible to adjust the position of the mirror to create better image quality. ****EXPOSURE TIME**** The software is compatible with different exposure times. By default, it's possible to set 4, 10 and 30 seconds, but can be changed to any other value. ****APERTURE**** The APERTURE tool is used to set the aperture of the telescope. It can be adjusted between 3 and 15. ****ZOOM**** The software allows you to set the zoom of the telescope. By default, the zoom is set to 2. ****TRIGGER**** With the help of the TRIGGER tool, it is possible to trigger the camera to shoot images automatically. The software can be set to use any of the following functions: - **MOBILE** - The camera will automatically take a picture when the user lifts the device from the mount. - **ZOOM** - The camera will automatically take a picture when the user lowers the zoom button. - **ZOOM AND MOBILE** - The camera will automatically take a picture when the user changes zoom and lifts the device from the mount. - **MOBILE AND ZOOM** - The camera will automatically take a picture when the user lowers the zoom button and lifts the device from the mount. ****MATCHING**** PixInsight allows to select parts of the images in the image catalog and to select images based on their coordinates. You can do so by using the MATCHING tool. ****CAMERA**** PixInsight can create a catalog based on your camera settings. It is possible to set the properties of the camera or even create a new camera model. 82157476af
